# About ZİRVE

Zirve Mould Company Limited was established in 2000 and since this time has become one of the leading mould producer in Turkey. We have highly skilled workforce with a wealth of knowledge and experience to undertake a wide variety of engineering work.

We always looking for the best on different types of pipe fitting moulds structures, components standard, machining process and quality controlling.

Our moulds reflect the state of the art of our company.

mould production & mould design

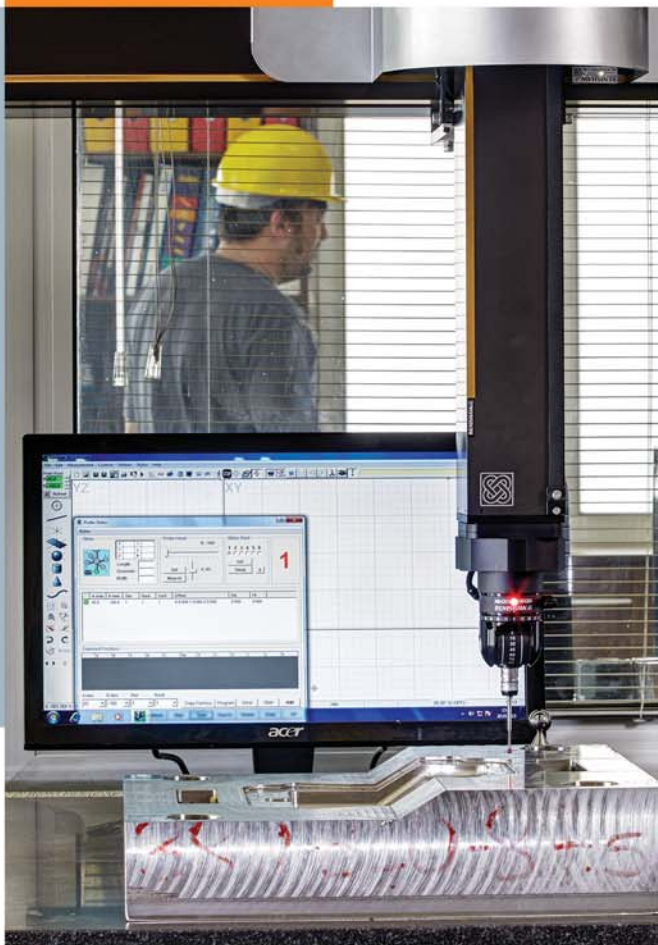

# What does ZIRVE do ?

Over the years, we have gained considerable experience in the mould field, particularly in producing pipe fittings for water supply and sewage disposal, reservoir and siphon group dies.

We test and optimize our moulds on injection molding machines of all different sizes in order to provide you with production ready tools. At our test centre, all the moulds undergo testing and adjustment for production conditions.

By doing so, we save time, reduce costs, increase capacity and provide more manpower advantages.

Aberlink Innovative Metrology  
Evolution in CMM technology

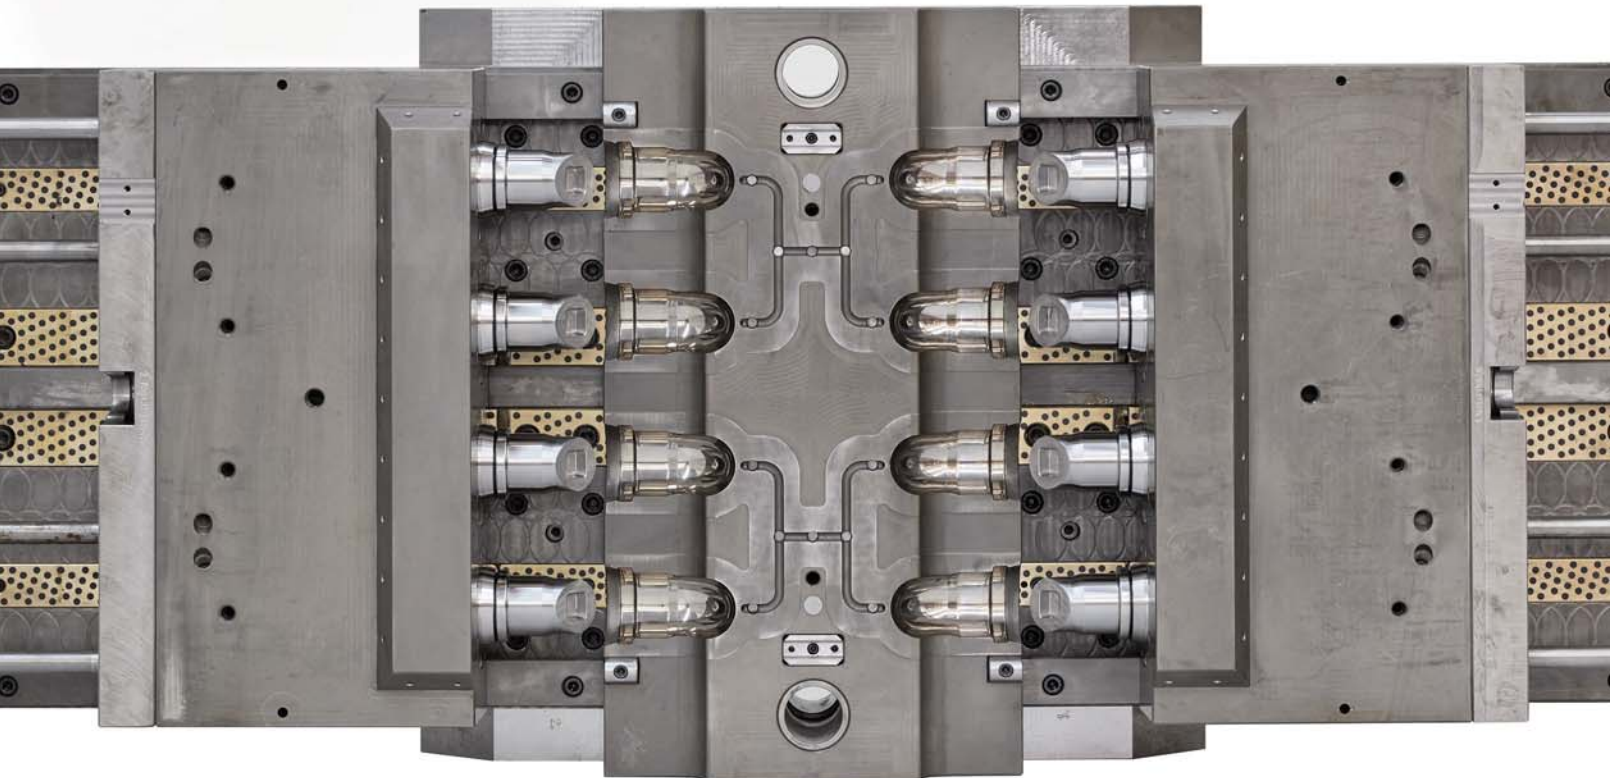

# Support Services

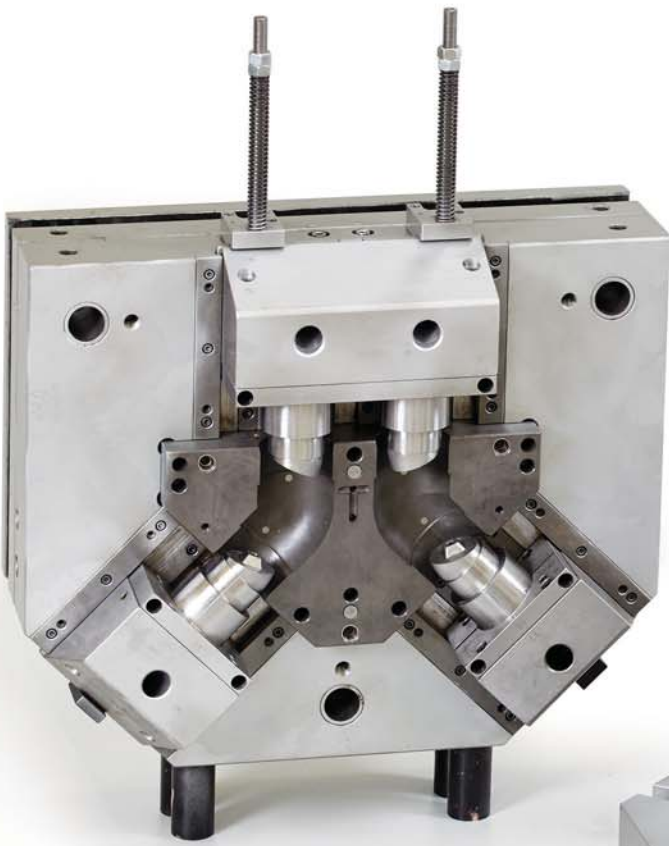

Zirve Mould Company Limited combines modern manufacturing facilities and the latest computer aided design technology to provide a comprehensive mould repair service.

We also support you with guaranteed spare parts and equipment supplies, the shortest delivery times and after-sales service.

We offer a service which appreciates and acknowledges the constraints placed upon our customers. We pride ourselves on being flexible yet precise in all projects undertaken and in establishing close working relationships with our customers.

By working closely with you from the start we can tailor our service to suit your needs. Quality is the core of our business.

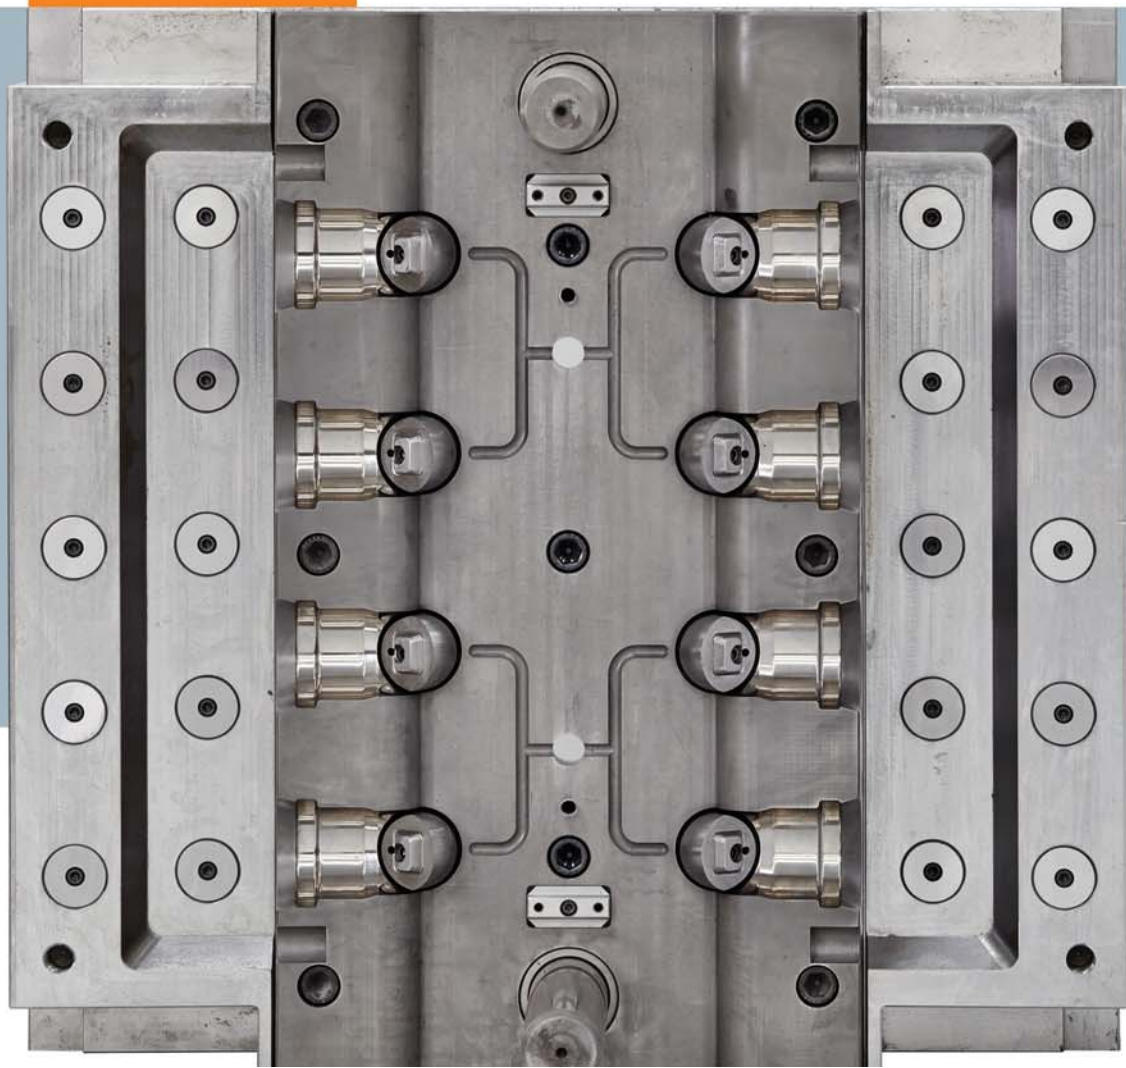

The highest molding technology in Turkey.
